

SC 200

CNC Screwing Center

Automatic screwing of the steel reinforcement bar in the PVC profile that comes out of RAPIDCUT 500 and TURBOCUT 500.

- Screws the profile that directly comes out from the TURBOCUT 500 or RAPIDCUT 500
- Automatic centering of the screwing position by servo motor controller
- Optional 3 screwing heads for maximum operation speed while working with long profiles.
- Ergonomic design and durable construction
- Minimum 300mm , Maximum 4300mm profile size workability.

Technical Specifications

- Power supply : 380-400 V, 3 ph, 50-60 Hz
- Total KW : 5 kW
- Motor KW : 1 kW
- Air Consumption : 50 lt/min
- Air pressure : 6-8 bar
- Machine Height : 1700 mm
- Machine Length : 4920 mm
- Machine Width : 5350 mm

-Machine Weight : 500 kg
